

Name  
8/26/16 or  
8/29/16  
Alg I

## Represent Functions as Rules and Tables

I can represent  
functions as  
rules and as  
tables.

### Example 3:

4)  $y = x - 5$

x	10	12	15	18	29
$y = x - 5$	5	7	10	13	24

Ch. 1 Quiz  
9/1 or 9/2

$$y = 10 - 5 = 5$$

$$y = 12 - 5 = 7$$

$$y = 15 - 5 = 10$$

$$y = 18 - 5 = 13$$

$$y = 29 - 5 = 24$$

Range: 5, 7, 10, 13, and 24

### Example 4:

5)

Time (h)	1	2	3	4
Pay (\$)	8	16	24	32

$$y = 8x$$

domain: 1, 2, 3, and 4

range: 8, 16, 24, and 32
